

Fall to the Level of Your Systems: Equity and Access and Functional Needs in Continuity Planning

Presented by: Allison Anderson-Cutright

Presentation Abstract: Continuity planning offers a rich environment to intentionally design recovery with equity and Access and Functional Needs (AFN). Learn ways to build equity and AFN in a Continuity Plan and watch out for the potential misuse of what should help you.

Learning Objectives:

- 1) Learn how to identify gaps in equity and Access and Functional Needs in a Continuity Plan
- 2) Learn some strategies to address those gaps
- 3) Identify ways to guard against the misuse of your Continuity Plan

Speaker Bio: Allison Anderson-Cutright-Cisneros (she/her) is the Business Continuity Specialist of UC Berkeley's Office of Emergency Management. She refers to herself as a professional backup plan maker. Her day-to-day involves strategizing, mitigating risk, and conducting continuity planning with campus departments. An alum of Embry-Riddle Aeronautical University - Prescott, she has built her work experience in the AmeriCorps VISTA program, the private sector, and higher education.
